

All her fault by Andrea mara

## 1. Introduction

In this report, an overall description of the publishing process completed for the novel All Her Fault by Andrea Mara is presented. In this project, the goal was to take the manuscript of this novel and make it a professionally published eBook. It would include the stages of the publishing process that were followed to create a high-quality digital book.

## 2. Project Overview

All Her Fault is a psychological thriller about a woman who loses her daughter while picking her up from school due to one unexpected turn. The story features fast-paced action, suspense, fear, guilt, and many other exciting elements. Despite being very gripping and interesting, there was still a need for improvements to the book manuscript.

## 3. Objectives

The main objective of the publishing process was to ensure readability and coherence through proper editing, which will make sure that the suspense and tension are not compromised in any way. Some other objectives include designing a cover that depicts the urgency and enigma of the novel, formatting the book in order to optimize its compatibility with various digital devices, and using metadata optimization for better discovery opportunities. The process also involved the formulation of distribution and marketing strategies.

## 4. Publishing Process

### 4.1 Manuscript Assessment

The publishing process started with the assessment of the manuscript, wherein special emphasis was put on its structure, pace, and character development. Special consideration was paid to the fact whether the suspense and chronology were maintained or not.

### 4.2 Development of the Editorial

At the editorial stage, it was necessary to make the manuscript clear and tense. In particular, at the developmental editing, work was performed in order to increase the pace and deliver plot elements.

The copy editing improved grammatical correctness, sentence structure, and stylistics, while the proofreading was aimed at making the manuscript error-free. As a result, an excellent manuscript was obtained.

#### 4.3 Designing and Formatting

A cover for the eBook, which emphasized the suspense and emotions associated with the story, was designed in the design phase. Moreover, the format of the manuscript was adapted to the requirements of digital publishing in order to provide readability and a consistent layout, as well as the convenience of use from various devices (e.g., e-reader, tablet, smartphone).

#### 4.4 Metadata Optimization

Keywords, categories, and descriptions were optimized in order to help in discovering the eBook in the search engines. It is worth emphasizing that metadata optimization plays a major role in positioning the work in the right literary niche, specifically in the psychological thriller genre.

#### 4.5 Distribution and Publishing

After completing the final version of the book, it was published on all the major digital publishing platforms. During this phase, it was ensured that all the technical specifications were met to facilitate easy publication and accessibility of the eBook on a global level. The distribution of the book was helpful in reaching out to a large number of readers.

#### 4.6 Marketing and Promotion

Support was provided for marketing and promoting the book. Marketing included helping with defining the target audience, developing the promotional approach, and planning the book launch event. All these activities were conducted to promote the book and ensure its success.

---

### 5. Results and Outcomes

Through the professional publication process, an engaging narrative with clear and coherent structure was developed along with a visually pleasing eBook. The results from this publication have been positive as the eBook could reach out to the desired target audience.

## 6. Analysis

The current case study emphasizes the significance of applying an efficient system for publishing books, including editing, design, and marketing aspects. The implementation of the stages in the publishing process increased the efficiency of achieving the desired results regarding the development and marketing of the book. One may conclude that any publishing success relies both on the content itself and proper publishing processes.

## 7. Conclusion

In summary, the publishing process of All Her Fault shows how an efficient publishing process transforms any manuscript into a high-quality eBook. The case study proves that the publishing process is based not only on the development of the content but also on proper presenting of it.
